

Underweight and obesity in France, 2022

Underweight in Women

- 1.4 million women with underweight.
- 6.0% prevalence, with no detectable change from 1990.

Obesity in Women

- 2.8 million women with obesity.
- 9.8% prevalence, a decrease of 2.2 percentage points from 1990.

Women

Underweight in Men

- 470,000 men with underweight.
- 2.6% prevalence, an increase of 1.0 percentage points from 1990.

Obesity in Men

- 2.8 million men with obesity.
- 10.2% prevalence, with no detectable change from 1990.

Men

Thinness in Girls

- 130,000 girls with thinness.
- 2.2% prevalence, with no detectable change from 1990.

Obesity in Girls

- 220,000 girls with obesity.
- 3.9% prevalence, with no detectable change from 1990.

Girls

Thinness in Boys

- 290,000 boys with thinness.
- 4.9% prevalence, an increase of 1.9 percentage points from 1990.

Obesity in Boys

- 260,000 boys with obesity.
- 4.4% prevalence, with no detectable change from 1990.

Boys

• Results are from NCD Risk Factor Collaboration "Worldwide trends in underweight and obesity from 1990 to 2022: a pooled analysis of 3663 population-representative studies with 222 million children, adolescents, and adults" *The Lancet*, 2024.

• Women and men are aged 20+ years and girls and boys are aged 5-19 years.

• France had 24 studies for women, 25 for men, 19 for girls, and 18 for boys.

• Prevalences presented here are age-standardised using the WHO Standard Population.

• Complete results are available at www.ncdrisc.org.
